

FreshFlow Block

Highly concentrated slow release microorganisms for removing odors, grease, fats and other organics from water recovery systems.

Directions

FreshFlow is a solid dissolvable block containing microorganisms which are held in a mesh bag. Lower the mesh bag and block into the water and tie the rope to the manhole ladder. When the block is gone, the mesh bag is easily removed and replaced. The block can last up to a month. The blocks are available in different sizes depending on the flow rate and other specific conditions of the application.

Application

For use in water recovery systems.
Removes odors, grease, fats and organics from water.

Technical Data

Appearance: Blue-green block
Odor: Perfumed
pH: 5.5
Biodegradable: Yes
Stability: Good

Storage Instructions

Wear personal protective equipment. Wash hands and face thoroughly after handling. Avoid formation of aerosols and dust from drying out of spilled preparation. Avoid splashing and high pressure washing. Ensure good ventilation of the room, when handling this preparation. Store container in a cool place. Store in cool, dry place.
